TECHNICAL DATA SHEET

RS 217-3857
Cleanguard

RS 217-3857 is a high performance cleaner polish for a wide variety of materials. It has been found to perform well on Perspex and other similar materials giving excellent cleaning characteristics without adversely affecting the plastic finish. It may also be used on glass.

RS 217-3857 also performs well when used for cleaning and re-furbishing rubber and other elastomers.
.

- Water based material in a pump spray that is environmentally friendly.
- Reduces the further build-up of soil, allowing less frequent maintenance.
- Removes long standing grime from rubbers and elastomers.

Directions for Use

RS 217-3857 has been formulated to be a general purpose, emulsion cleaner polish with excellent plastics compatibility. It may be used on a wide variety of materials in the office, workshop, factory and elsewhere. It provides a smear free surface that resists future contamination.

RS 217-3857 is an emulsion product and therefore requires shaking before every application. After shaking, spray onto the area to be cleaned and wipe off with a cloth. After the wet product has been completely removed, buff with a lint free cloth to give a polished surface which will resist further soiling.

RS, Professionally Approved Products, gives you professional quality parts across all products categories. Our range has been testified by engineers as giving comparable quality to that of the leading brands without paying a premium price.
