1224.E - Worksite-maintenance fixed vices

Description:

● Vices in spheroid graphite cast iron, tensile strength 700 N/mm² minimum.
● Wide bearing base of the prism guide/mobile jaw: lack of guide flexion, vice operation preserved even under heavy loads.
● Interchangeable parallel jaws. High wear resistance, hardness 48/53 HRc.
● Removable V-shaped jaws for tightening the pipes. Hardness 40/46 HRc.
● Adjustment system by 2 complex gap compensation screws.
● Burnished control bar.
