Combi Sockets • for multiadapter

EH 22330.

Product Description

A bipod and other components* such as action cameras and/or IR illuminators can be attached to the multiadapter. The multiadapter is attached to the front shaft via the 9.5 mm locking pin which is inserted in the combi socket. The combi socket is compatible with the PUSH & GO products in the sizes 9.5 mm and 6.0 mm. Up to three Picatinny rails can be mounted on the multiadapter. There are two PUSH & GO sockets on the underside, either 9.5 mm or 6.0 mm in size. The rear one is for attaching a sling swivel. The front one can be used instead of a Picatinny rail to mount the stud adapter,e.g. for mounting a bipod. The use of aluminium and titanium makes the multiadapter and combi socket very lightweight.
*The valid legal regulations must be observed.
Be sure to observe the minimum distance to the barrel specified in the assembly instructions!

Material

Bushing
- Stainless steel 1.4305, black

Seal
- NBR

Body
- Titanium, black

Spring
- Stainless Steel

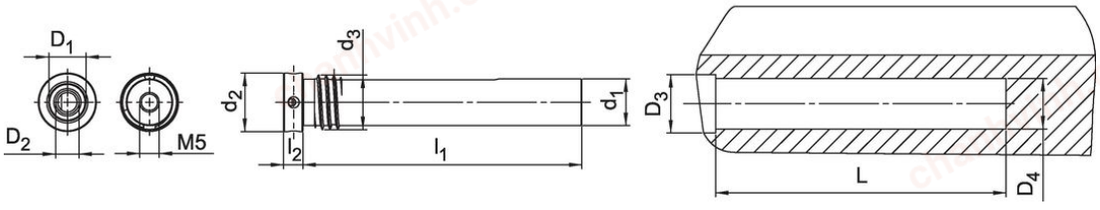

Pin
- Stainless steel

Assembly

Quick and easi to install by an experienced gunsmith!
Follow the assembly instructions.
