Technical Data Sheet

LOCTITE® 2422™

January 2011

PRODUCT DESCRIPTION

LOCTITE® 2422™ provides the following product characteristics:

Technology	Acrylic
Chemical Type	Dimethacrylate ester
Appearance (uncured)	Blue paste[LMS]
Components	One component - requires no mixing
Viscosity	High, thixotropic
Cure	Anaerobic
Secondary Cure	Activator
Application	Threadlocking
Strength	Medium

LOCTITE® 2422™ is designed for the locking and sealing of threaded fasteners which require normal disassembly with standard hand tools. The product cures when confined in the absence of air between close fitting metal surfaces and prevents loosening and leakage from shock and vibration. Particularly suitable for applications on less active substrates such as stainless steel and plated surfaces, where disassembly with hand tools is required for servicing. Particularly suited for applications where extreme high temperature resistance is required.

TYPICAL PROPERTIES OF UNCURED MATERIAL

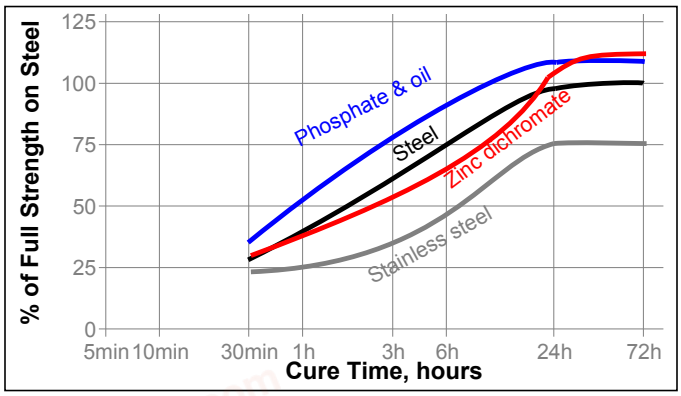

Specific Gravity @ 25 °C	1.18
Viscosity, Cone & Plate, mPa·s (cP), PHYSICA, 50mm Parellel plates at 0.5mm gap @ 50 s-1, 25°C	35,000 to 80,000[LMS]

Flash Point - See MSDS

TYPICAL CURING PERFORMANCE

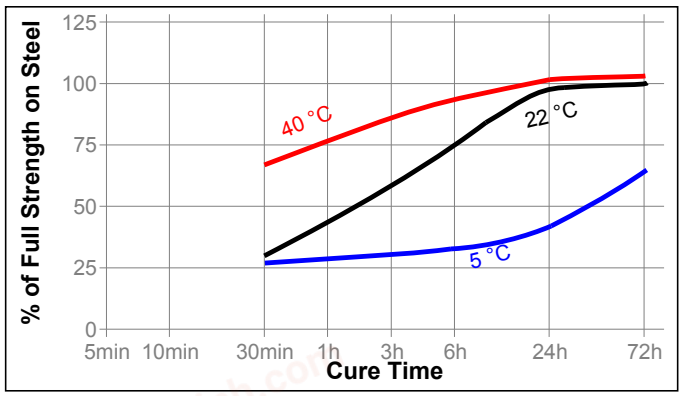

Cure Speed vs. Substrate

The rate of cure will depend on the substrate used. The graph below shows the breakloose strength developed with time on compared to different materials and tested according to ISO 10964, pretorqued to 5 N·m.

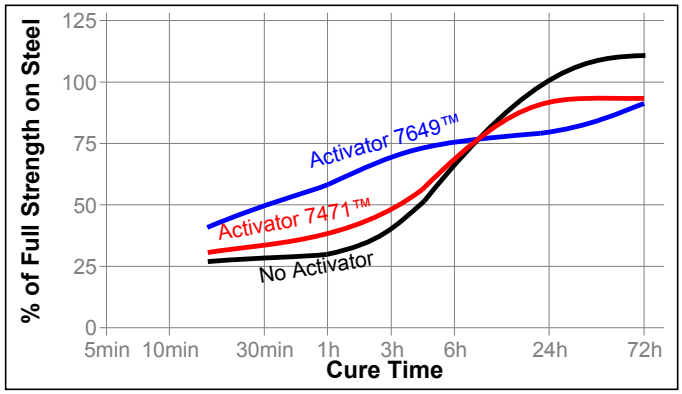

Cure Speed vs. Temperature

The rate of cure will depend on the temperature. The graph below shows the breakloose strength developed with time at different temperatures on 3/8 x 16 degreased steel nuts & bolts and tested according to ISO 10964, pretorqued to 5 N·m.

Cure Speed vs. Activator

Where cure speed is unacceptably long, or large gaps are present, applying activator to the surface will improve cure speed. The graph below shows the breakloose strength developed with time using Activator 7471™ and Activator 7649™ on zinc dichromate M10 steel nuts and bolts and tested according to ISO 10964, pretorqued to 5 N·m.

TYPICAL PERFORMANCE OF CURED MATERIAL

Adhesive Properties

After 24 hour @ 22 °C

Breakloose Torque, ISO 10964, Pre-torqued to 5 N·m:

3/8 x 16 steel nuts and bolts (grade 5) (degreased)	N·m	7.9 to 28.4[LMS]
	(lb.in.)	(70 to 251)

chanhvinh.com

After 72 hours @ 22 °C

Breakaway Torque, ISO 10964:

3/8 x 16 steel nuts and bolts (degreased)	N·m (lb.in.)	11.6 (102)

Prevail Torque, ISO 10964:

3/8 x 16 steel nuts and bolts	N·m (lb.in.)	1.4 (12)

Breakloose Torque, ISO 10964, Pre-torqued to 5 N·m:

3/8 x 16 steel nuts and bolts (degreased)	N·m (lb.in.)	15.5 (137)

Prevail Torque, ISO 10964, Pre-torqued to 5 N·m:

3/8 x 16 steel nuts and bolts (degreased)	N·m (lb.in.)	1.2 (11)

Breakloose Torque, ISO 10964, Pre-torqued to 5 N·m:

3/8 x 16 phosphate and oil nuts and bolts, as received	N·m (lb.in.)	12.4 (110)

Prevail Torque, ISO 10964, Pre-torqued to 5 N·m:

3/8 x 16 phosphate and oil nuts and bolts, as received	N·m (lb.in.)	0.6 (5.5)

TYPICAL ENVIRONMENTAL RESISTANCE

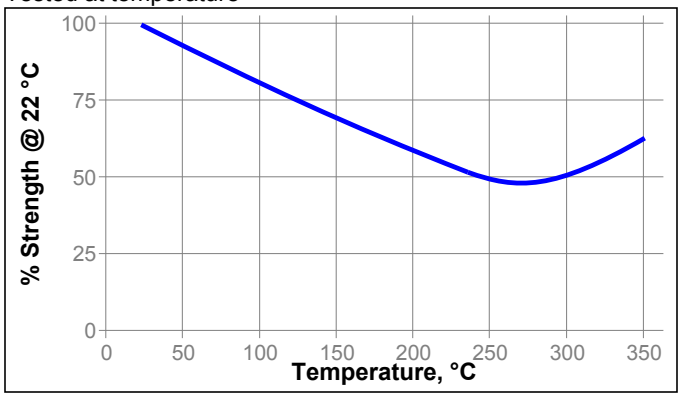

Cured for 1 week @ 22 °C

Breakloose Torque, ISO 10964:

3/8 x 16 phosphate & oil nuts and bolts, as received

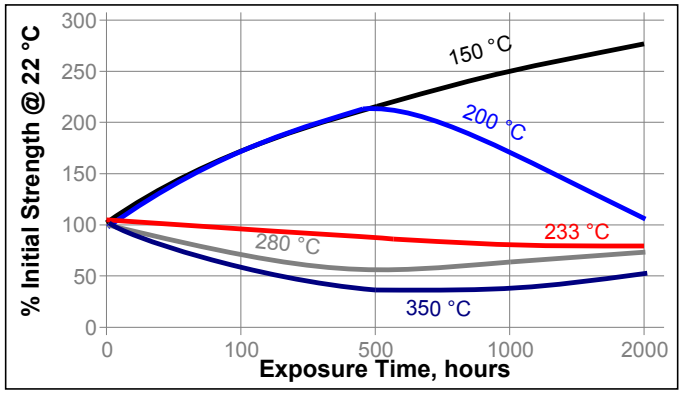

Hot Strength

Tested at temperature

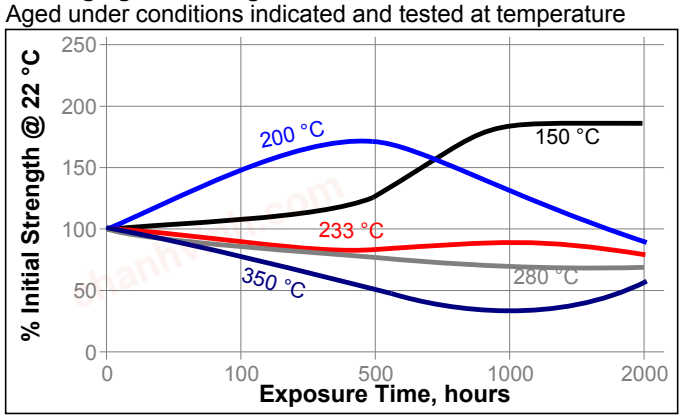

Heat Aging

Aged at temperature indicated and tested @ 22 °C

Heat Aging/Hot Strength

Aged under conditions indicated and tested at temperature

Chemical/Solvent Resistance

Aged under conditions indicated and tested @ 22 °C.

		% of initial strength		
Environment	**°C**	**500 h**	**1000 h**	**2000 h**
Motor oil	125	125	140	155
ATF	87	100	100	100
Gasoline (unleaded)	22	75	75	75
Brake fluid	22	105	105	105
Water/glycol 50/50	87	125	140	165
Isopropanol	22	120	120	120

GENERAL INFORMATION

This product is not recommended for use in pure oxygen and/or oxygen rich systems and should not be selected as a sealant for chlorine or other strong oxidizing materials

For safe handling information on this product, consult the Material Safety Data Sheet (MSDS).

Where aqueous washing systems are used to clean the surfaces before bonding, it is important to check for compatibility of the washing solution with the adhesive. In some cases these aqueous washes can affect the cure and performance of the adhesive.

This product is not normally recommended for use on plastics (particularly thermoplastic materials where stress cracking of the plastic could result). Users are recommended to confirm compatibility of the product with such substrates.

Directions for use:

For Assembly

1. For best results, clean all surfaces (external and internal) with a LOCTITE® cleaning solvent and allow to dry.
2. If the material is an inactive metal or the cure speed is too slow, spray all threads with Activator 7649™ or Activator 7471™ and allow to dry.
3. To prevent the product from clogging in the nozzle, do not allow the tip to touch metal surfaces during application.
4. **For Thru Holes**, apply several drops of the product onto the bolt at the nut engagement area.
5. **For Blind Holes**, apply several drops of the product down the internal threads to the bottom of the hole.
6. **For Sealing Applications**, apply a 360° bead of product to the leading threads of the male fitting, leaving the first thread free. Force the material into the threads to thouroughly fill the voids. For bigger threads and voids, adjust product amount accordingly and apply a 360° bead of product on the female threads also.
7. Assemble and tighten as required.

For Disassembly

1. Remove with standard hand tools.
2. In rare instances where hand tools do not work because of excessive engagement length, apply localized heat to nut or bolt to approximately 250 °C. Disassemble while hot.

For Cleanup

1. Cured product can be removed with a combination of soaking in a Loctite solvent and mechanical abrasion such as a wire brush.

Loctite Material Specification[LMS]

LMS dated December 12, 2007. Test reports for each batch are available for the indicated properties. LMS test reports include selected QC test parameters considered appropriate to specifications for customer use. Additionally, comprehensive controls are in place to assure product quality and consistency. Special customer specification requirements may be coordinated through Henkel Quality.

Storage

Store product in the unopened container in a dry location. Storage information may be indicated on the product container labeling.

Optimal Storage: 8 °C to 21 °C. Storage below 8 °C or greater than 28 °C can adversely affect product properties. Material removed from containers may be contaminated during use. Do not return product to the original container. Henkel Corporation cannot assume responsibility for product which has been contaminated or stored under conditions other than those previously indicated. If additional information is required, please contact your local Technical Service Center or Customer Service Representative.

Conversions

(°C x 1.8) + 32 = °F
kV/mm x 25.4 = V/mil
mm / 25.4 = inches
µm / 25.4 = mil
N x 0.225 = lb
N/mm x 5.71 = lb/in
N/mm² x 145 = psi
MPa x 145 = psi
N·m x 8.851 = lb·in
N·m x 0.738 = lb·ft
N·mm x 0.142 = oz·in
mPa·s = cP
