ÖLFLEX® Classic 110 SY

ÖLFLEX® CLASSIC 110 SY cables are VDE approved control- and connecting cables for flexible use and fixed installation for medium mechanical use. They are for use in dry, damp and wet rooms. They may only be installed outdoors with UV-protection and in observation of the temperature range. At room temperature it is generally resistant against acids, caustics solutions and certain oils. ÖLFLEX® CLASSIC 110 SY cables are used as supply and interconnecting cable for controlling machine tools, production lines, control equipment on conveyors, also for use in measuring regulating and computer units. Suitable for freely moved without forced guidance and tensile stress. The braid of galvanized steel wires are an additional mechanical protection. ÖLFLEX® CLASSIC 110 SY may not be stored outside.
