Cable Tie

Product Description

RS PRO fluorescent cable ties are a type of fastener used for holding items together, most commonly electrical cables or wires. Fluorescent cable ties are ideal for use in confined spaces where there is little light available to identify the colour. These ties are a one-piece, self-locking fastener that functions like straps to keep cables tidy. They are available in 3.6mm widths and 200 mm lengths with a choice of 5 colours (pink, green, blue, yellow and orange). The coloured ties enable colour coding of cables or other co mponents.
