TEMPERATURE TRANSMITTER

Product Description

The USB configuration kit provides a link between the USB port of your PC or Lap-Top and products that use loop communication.
The product, as well as the configurator, is powered during configuration from your PC's USB port so no additional power supply is needed during the configuration process.

Free software to use with all our programmable products is available.

Products that are configured with this device are:

0458495 - TEMPERATURE TRANSMITTER
0458745 - TEMPERATURE TRANSMITTER
0458748 - TEMPERATURE TRANSMITTER
