Explosion proof Aquarium heaters

Heating Elements

DESCRIPTION

Aquarium heaters are used for heating water in domestic fish tanks and industrial small water tanks to maintain temperatures between 20-34deg C. They are available in three different wattages as above.

CONSTRUCTION

The heaters are made from explosion proof glass for added protection and are supplied with suction cups for fitting. A finger adjustable thermostat is fitted for temperature setting.

INSTALLATION

The heaters should always be fitted below the waterline for best use and premature failure. Suction cups to be used on a smooth surface.
