Concept of operation

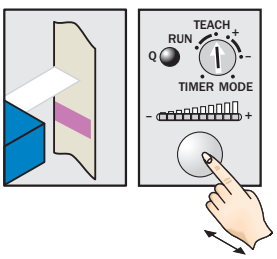

Teach-in static

1. Position mark

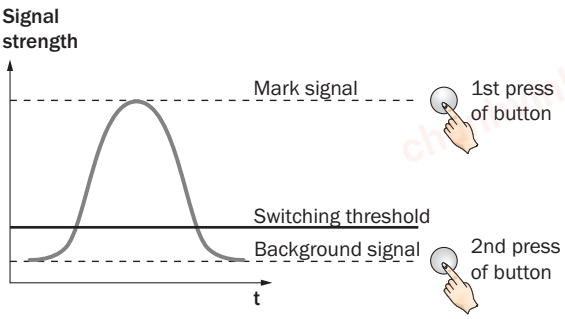

Turn rotary switch to “TEACH” position and press and hold teach-in button > 1 s.
Yellow LED flashes slowly.

2. Position background

Press and hold teach-in button again > 1 s. Yellow LED goes out.

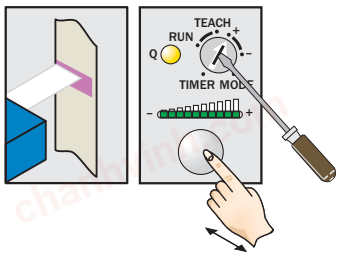

Sensitivity setting

Note
The bar graph display shows detection reliability. The more LEDs that illuminate, the better the teach-in.

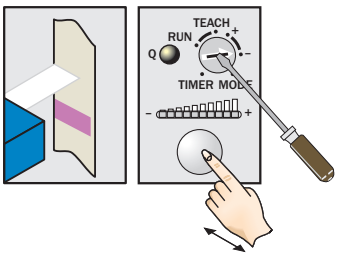

Button +/-

1. Position mark

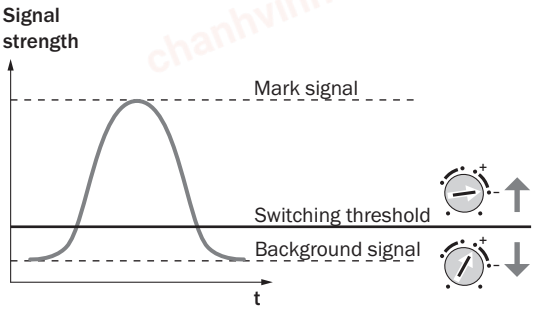

Turn rotary switch to “+” position and press and hold teach-in button until yellow light goes out (more green LEDs illuminate on the bar display).

2. Position background

If yellow LED illuminates, turn rotary switch to “–” position and press and hold teach-in button until yellow light just goes out (green LEDs go out on the bar display).

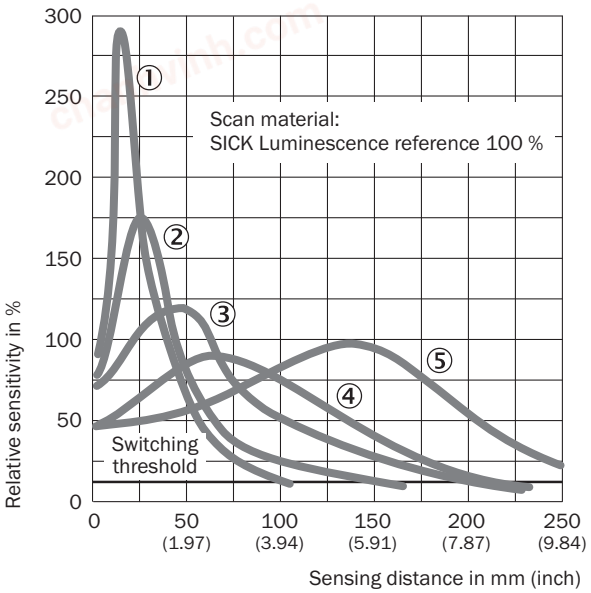

Sensitivity setting

Note for all settings
Once configuration is complete, turn the rotary switch to the “RUN” position. The bar display then shows the luminescence intensity (regardless of switching threshold setting).
Adjustments are intendend for luminescence background suppression.
