SIEMENS

Data sheet 6GT2890-2AC00

product description	aluminum holding plate
	SIMATIC RF600 aluminum holding plate for RF610R reader, RF615R and antennas RF615A, RF622A; 180 x 130 x 2.5 mm LxWxH; packing unit 1 unit.

suitability for use	For mounting RF600 readers and antennas on level substrates
suitability for operation	mounting for RF610R, RF615R readers and RF615A, RF622A antennas
mechanical data	
material	aluminum
color	silver
design, dimensions and weights	
width	180 mm
height	130 mm
depth	2.5 mm
net weight	150 g

Security information	
security information	Siemens provides products and solutions with industrial cybersecurity functions that support the secure operation of plants, systems, machines and networks. In order to protect plants, systems, machines and networks against cyber threats, it is necessary to implement – and continuously maintain – a holistic, state-of-the-art industrial cybersecurity concept. Siemens' products and solutions constitute one element of such a concept. Customers are responsible for preventing unauthorized access to their plants, systems, machines and networks. Such systems, machines and components should only be connected to an enterprise network or the internet if and to the extent such a connection is necessary and only when appropriate security measures (e.g. firewalls and/or network segmentation) are in place. For additional information on industrial cybersecurity measures that may be implemented, please visit www.siemens.com/cybersecurity-industry. Siemens' products and solutions undergo continuous development to make them more secure. Siemens strongly recommends that product updates are applied as soon as they are available and that the latest product versions are used. Use of product versions that are no longer supported, and failure to apply the latest updates may increase customer's exposure to cyber threats. To stay informed about product updates, subscribe to the Siemens Industrial Cybersecurity RSS Feed under https://www.siemens.com/cert. (V4.7)
