RECOMMENDATIONS FOR USE

- CLEANING / MAINTENANCE Both new and used gloves should be thoroughly inspected before being worn to ensure no damage is present. If any damage is found on the gloves they should be disposed of. Gloves should not be left in contaminated condition if reuse is intended in which case gloves should be cleaned as far as possible. To clean, wipe with a damp cloth. Note: The performance characteristics of worn and laundered gloves may differ from the results shown.
- STORAGE Ideally stored in dry conditions between 10°C and 30°C in the original packaging and sheltered from direct light. Do not exceed 40°C.
- OBSOLESCENCE When stored as recommended, the gloves will not suffer a change in mechanical properties for up to three years from the date of manufacture. Service life cannot be specified and depends on the application and it is the responsibility of user to ascertain suitability of the glove for its intended use.
- GENERAL None of the materials or processes used in the manufacture of these products is known to be harmful to the wearer. If reaction was to occur, then obtain medical assistance.
- CAUTION! Avoid using near moving machinery due to entanglement hazard.
- PLEASE NOTE The results of the physical tests should help in glove selection, however it must be understood that actual conditions of use cannot be simulated and it is the responsibility of the end user and not the manufacturer to determine glove suitability for the intended use.
