Datasheet

Raptor X Series

Part No:
MA8005.A.001

Description

Raptor X - 5-in-1 Screwmount Antenna with GNSS - 2m RG-174, SMA(M) and 4* 5G/4G – 2m TGC-302, SMA(M)

Features:

1* GNSS Covering L1/L5 Bands
4* 5G/4G Cellular Covering 600-6000MHz
Dimensions : 350mm x 70mm x 39mm
M22 Thread Mount
IP69K Rated Enclosure
Cables: GNSS with 2m RG-174 and 5G/4G with 2m TGC-302
IK10 Rated Enclosure
Connector: GNSS with SMA(M) and 5G/4G with SMA(M)
Custom Cables and Connectors Available
RoHS & Reach Compliant

1. Introduction

Introducing the Taoglas Raptor X MA8005, a low-profile, sleek, 5-in-1 combination antenna engineered for he next generation of routers and gateways. The advanced combination antenna offers dual-band GNSS L1/L5 for exceptional navigational positional accuracy and high-efficiency 5G/4G wideband cellular MIMO connectivity spanning 600-6000MHz for superior mobile connectivity.

The Raptor X boasts a compact form factor of just 350 x 70 x 39mm, setting a new market standard for products containing up to 10 antennas. With a height of only 39mm, it is ideal for vehicle roof installations were height constraints are common, typically below 80mm. Its sleek, 70mm design allows it to fit seamlessly on various NEMA cabinets and between the ribs on many vehicle roofs. The MA8005 has an extremely robust IP69K rated enclosure allowing for the most demanding of use cases and applications.

Typical applications include:
- Emergency and First Responder Vehicles
- EV Charger Stations
- Smart Industry and Warehouse Applications
- Private LTE Networks

The MA8005, part of the Raptor X series, offers customization with up to ten connections, one GNSS, four cellular, and five Wi-Fi antennas tailored for specific routers and customer configurations. All cables and connectors can be fully customized to meet your unique requirements.

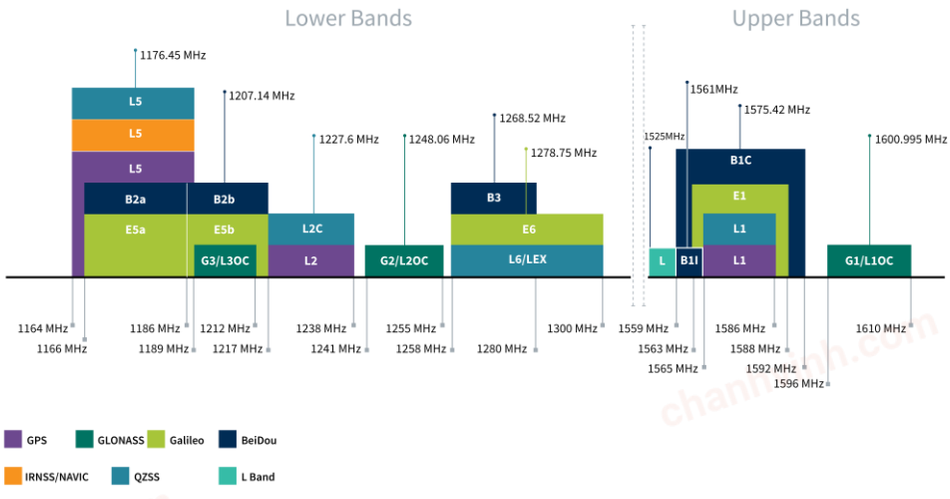

For further information on how to integrate the Raptor X or for orders, please contact your regional Taoglas customer support team.
