CN-A110 Series

30-200W, 60 to 160V Input DC-DC Converters

Industrial

Railway

The rugged quarter and half brick 30 to 200W CN-A110 series of isolated DC-DC converters operate from a wide 60 to 160V input. With an input to baseplate isolation of 2,000Vac and 3,000Vac input to output, the series is designed for use on 110V nominal input rail and substation power systems. In addition, the baseplate cooled modules meet the rolling stock IEC 61373 Category 1, Class B shock / vibration standards and are designed to meet EN 45545-2 (Fire protection on railway vehicles). As standard, the CN-A110 series features remote sense, remote on/off and output voltage adjustment. The 200W model also offers active current share for parallel or redundant operation (12 - 24V models).

Features	Benefits
• Wide Input Range	• Supports 110V Input Rail and Substation Systems
• Quarter and Half Brick Packages	• Less Board Area Needed
• Certified to IEC 62368-1, Designed to Meet IEC 61373	• Easier System Compliance
• Current Share Function (200W Model)	• Can be Paralleled for Higher Power Applications
• No Derating at High Ambient Temperatures	• Greater Useable Power
